Using `<List>`, and the list has the values
(34,55,69)
write lines of codes
That print the numbers and if they are
Divided by 3

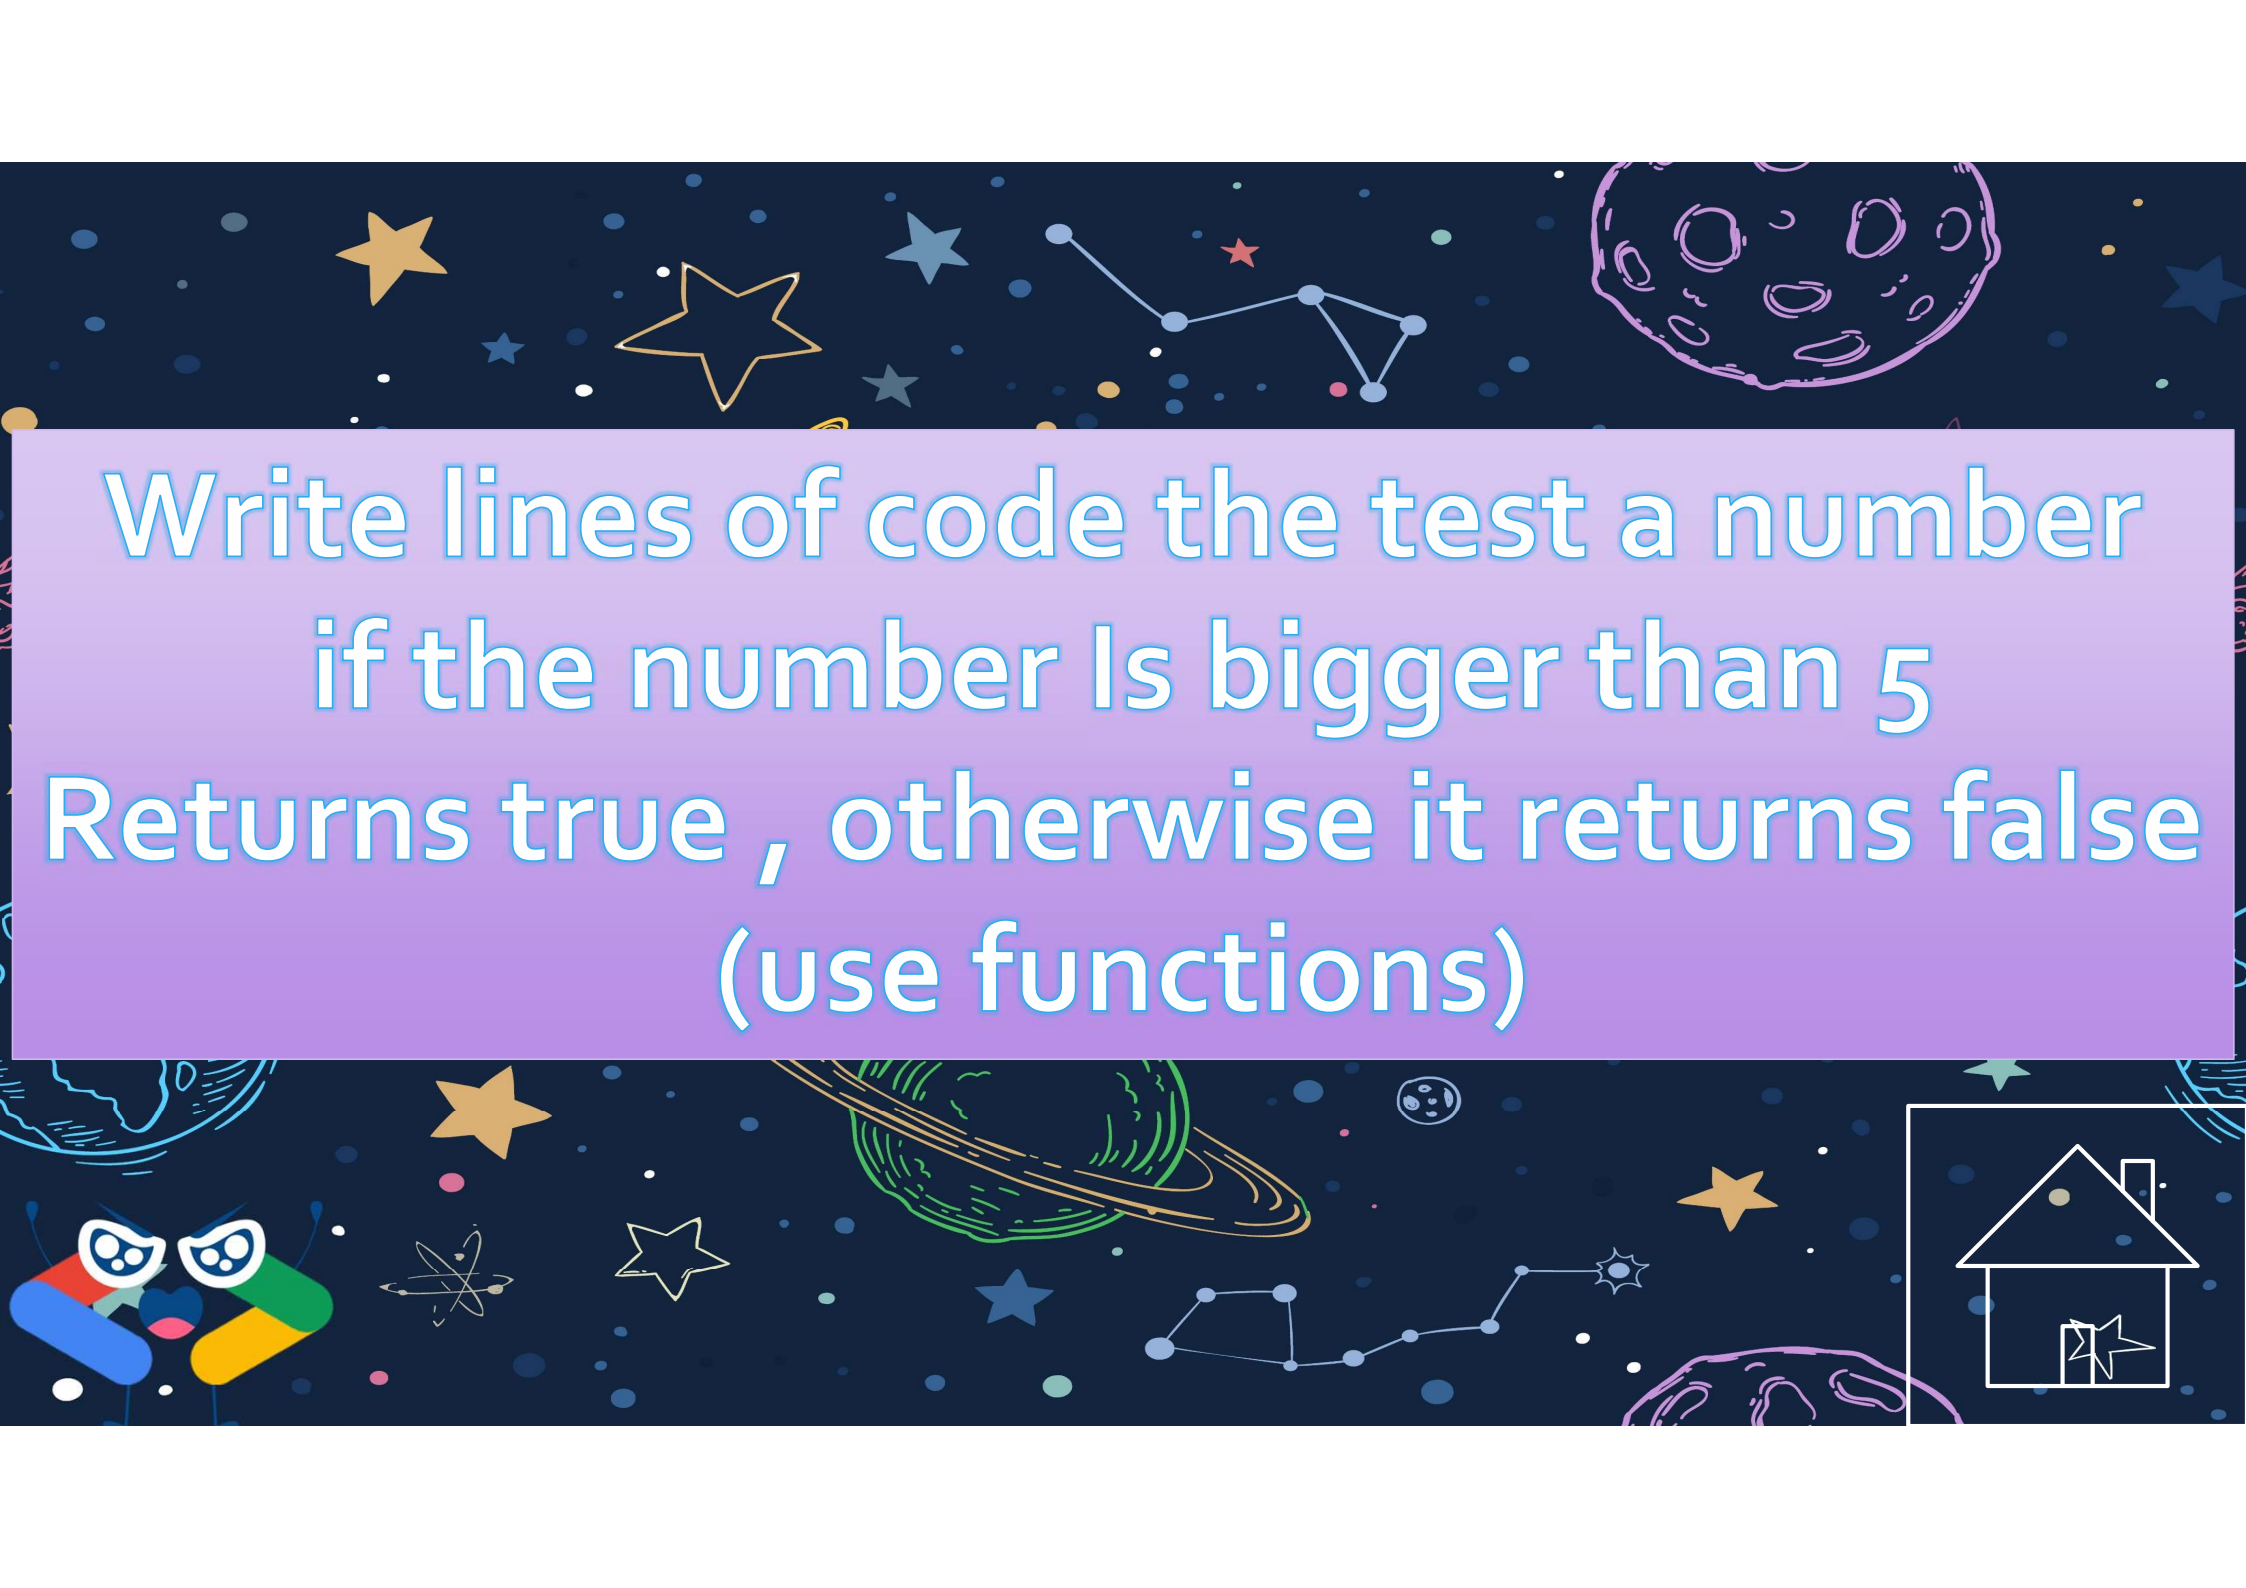

Enter A number

5

5 is not even

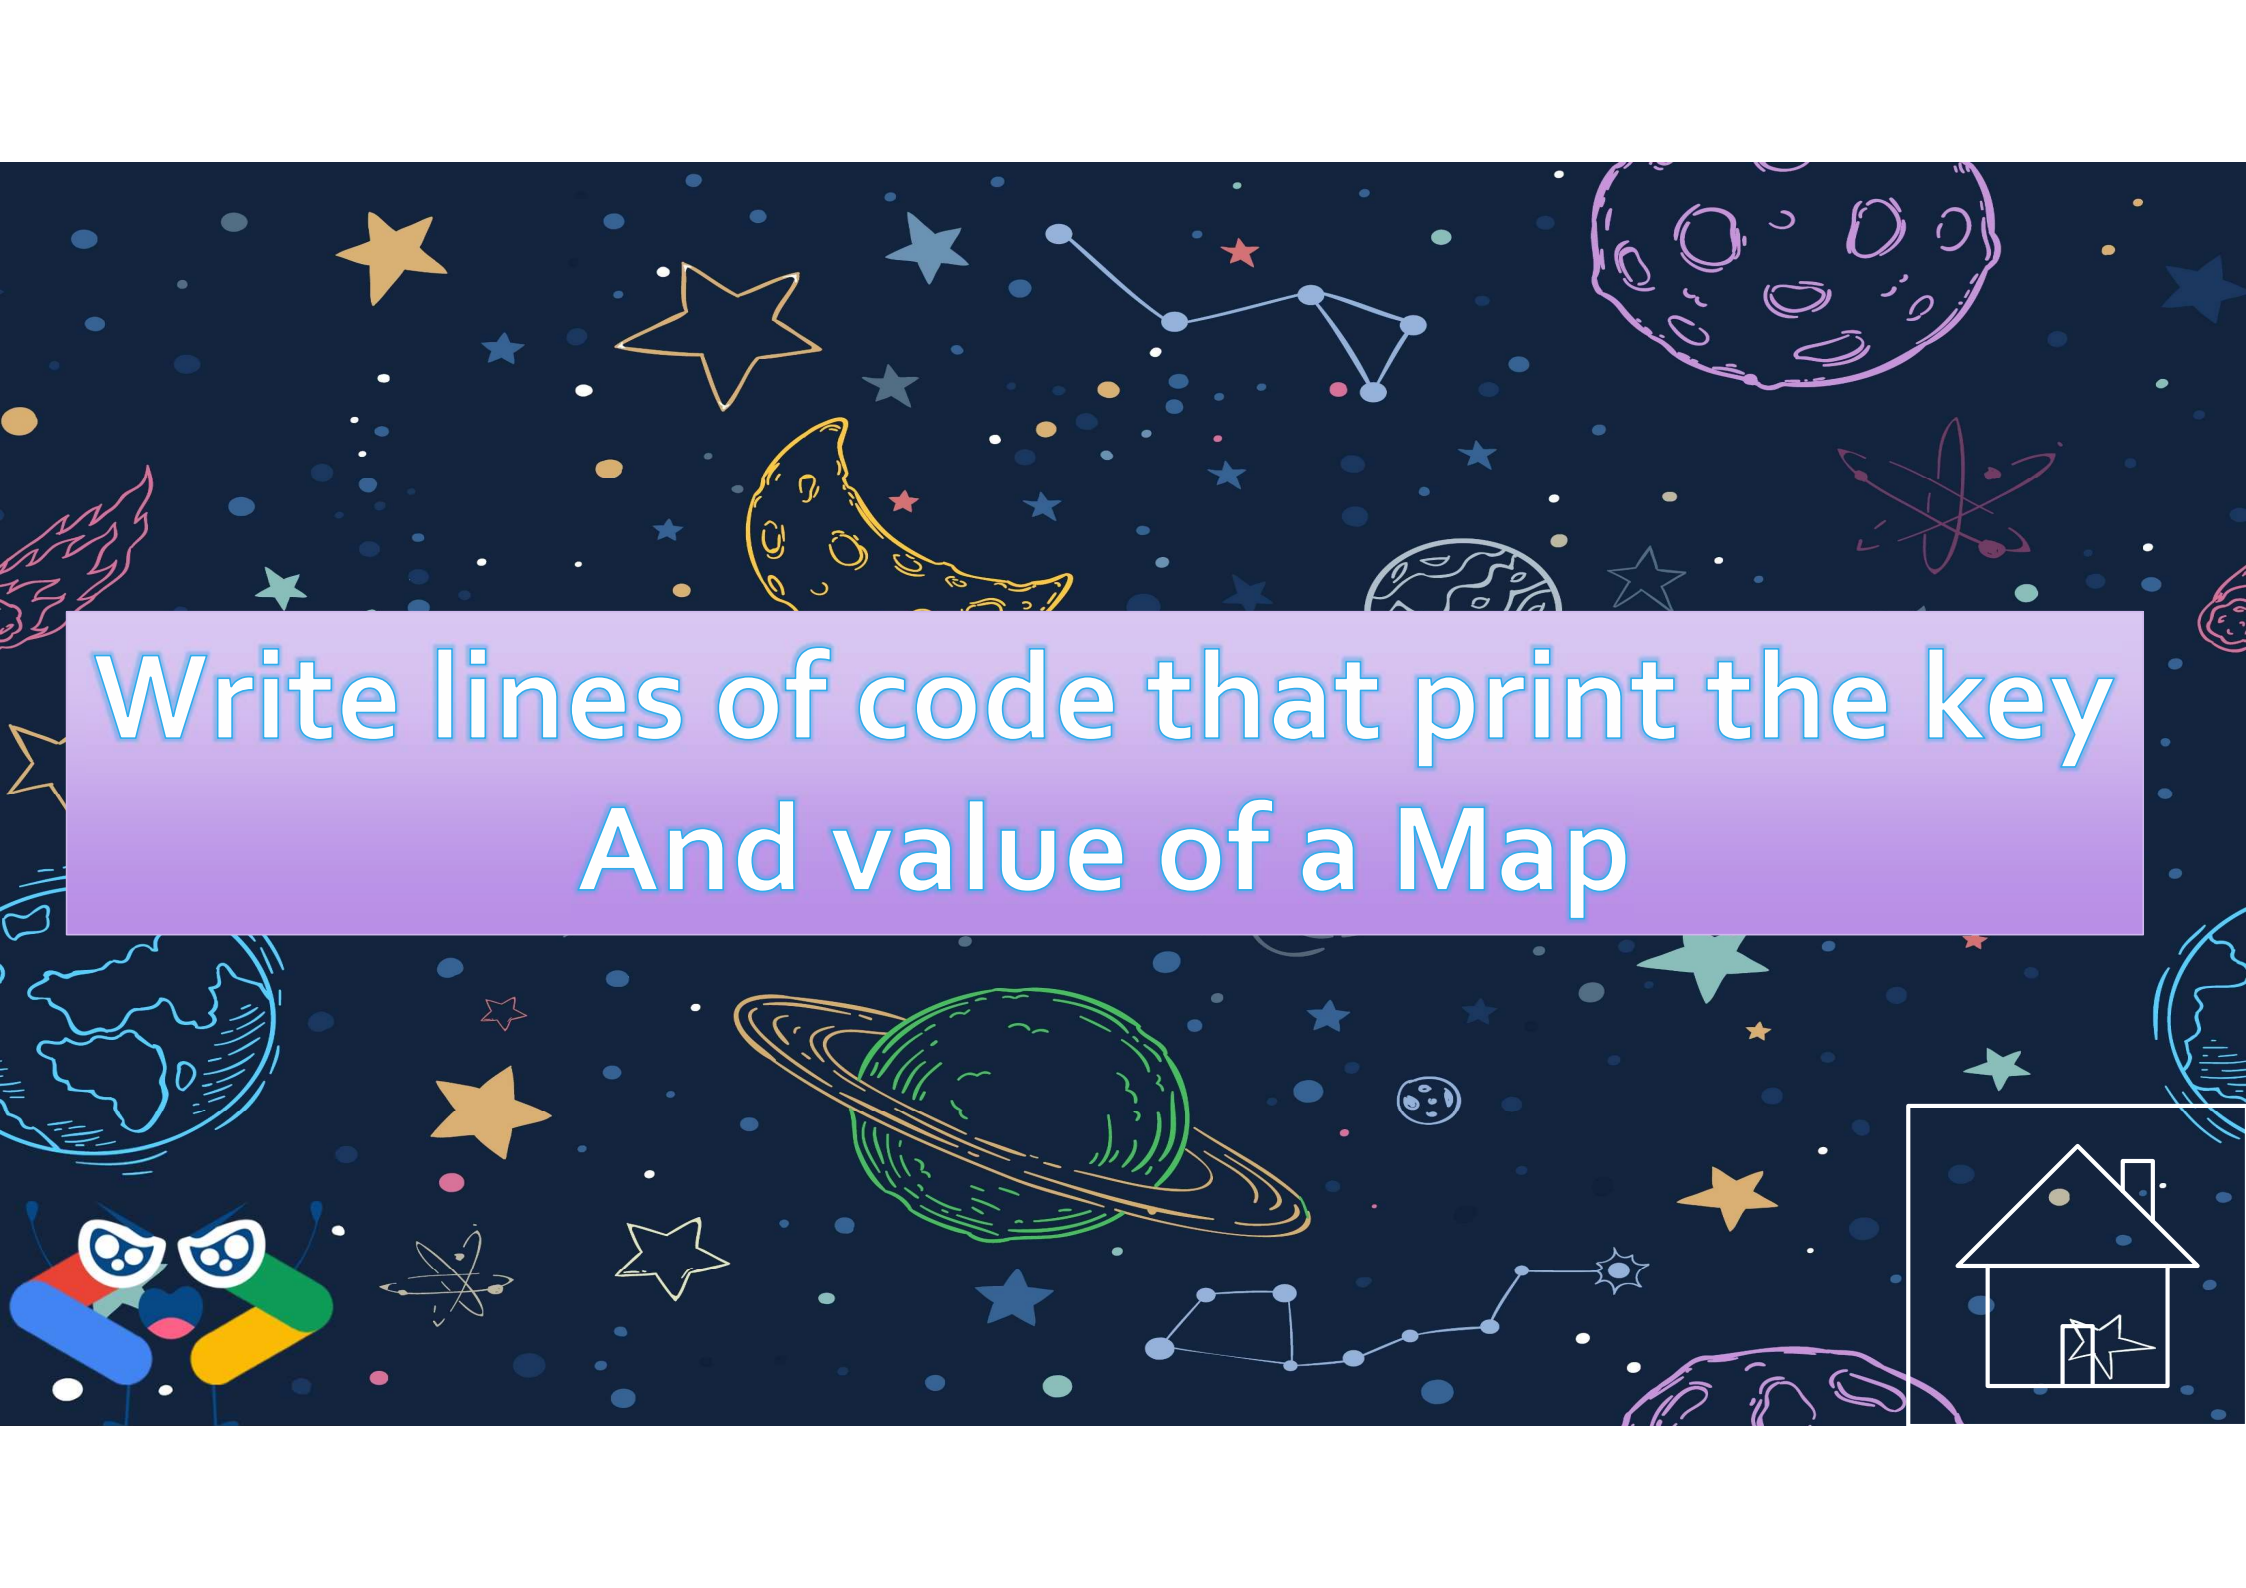

Write lines of code to test a number
if the number is bigger than 5
Returns true, otherwise it returns false
(use functions)

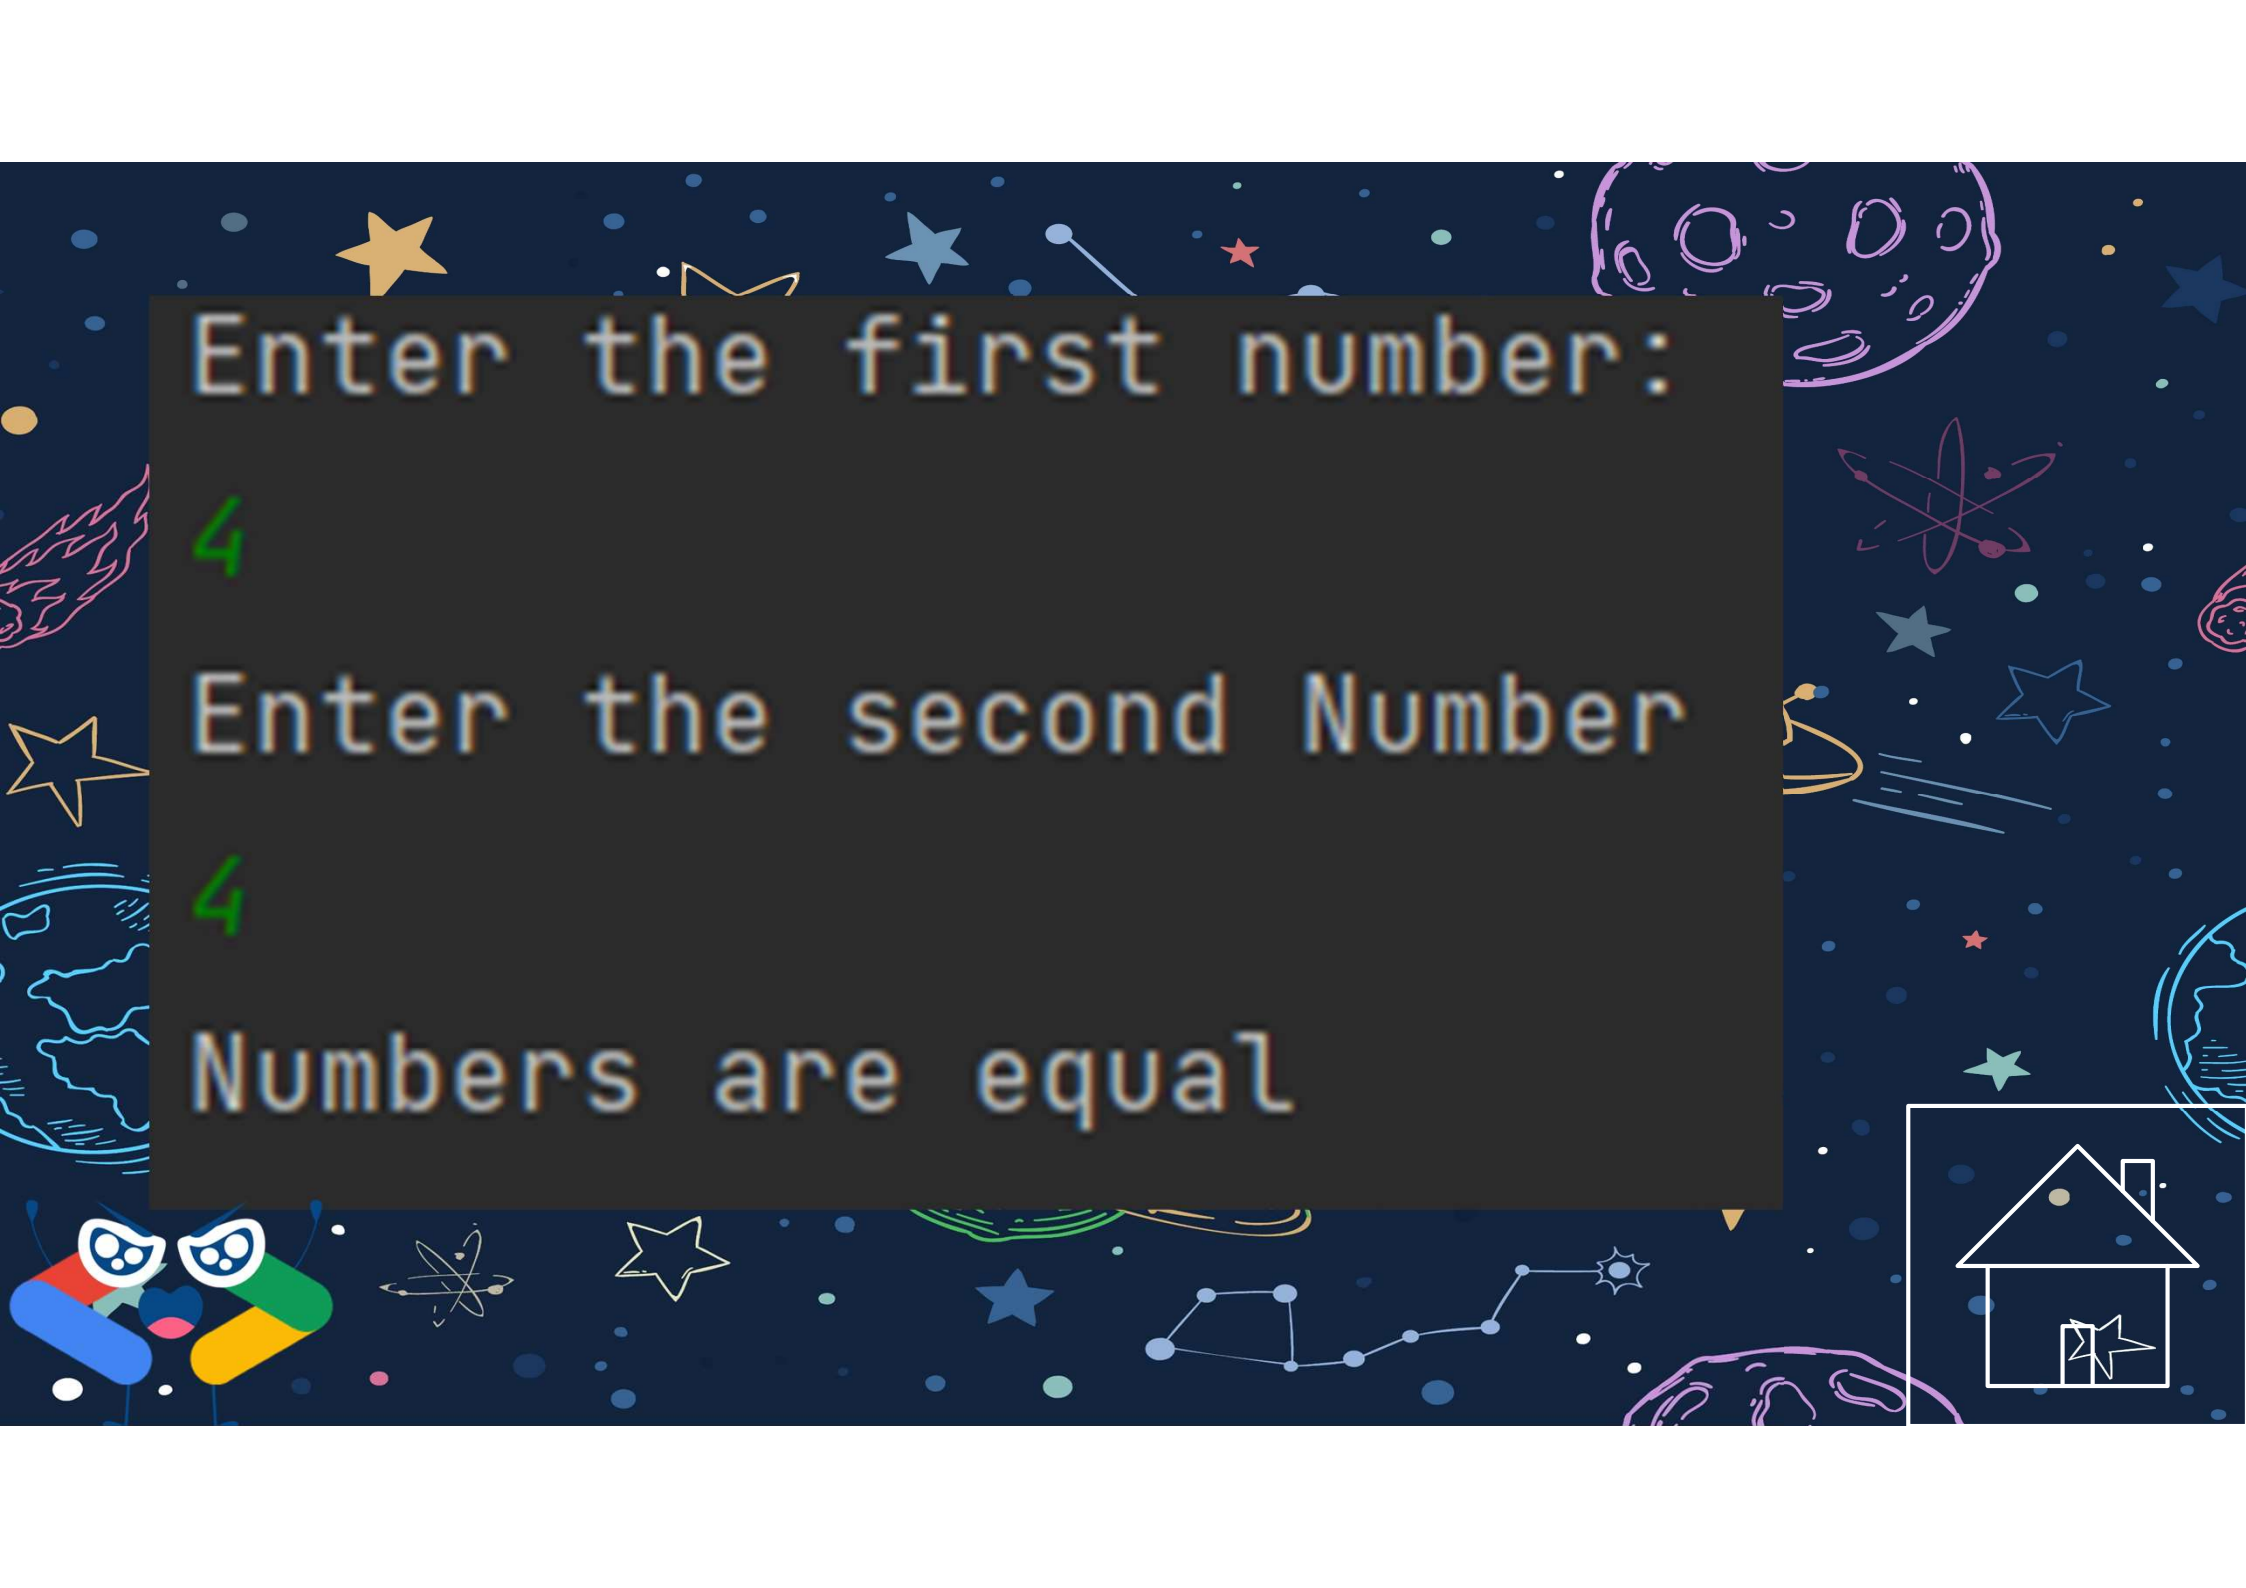

A dark blue background filled with various space-themed illustrations. On the left, there's a large yellow star, a pink comet, a blue star, and a drawing of Earth. At the bottom left, a colorful alien head with large eyes is visible. On the right, there's a large purple moon, a blue constellation, a yellow UFO, a pink atom, a blue star, a yellow star, and a white house icon with a chimney and a window. The text is centered in a dark grey box.

1	odd
2	even
3	odd
4	even
5	odd
6	even
7	odd
8	even
9	odd
10	even

Write lines of code that print the key
And value of a Map

Enter the first number:

4

Enter the second Number

4

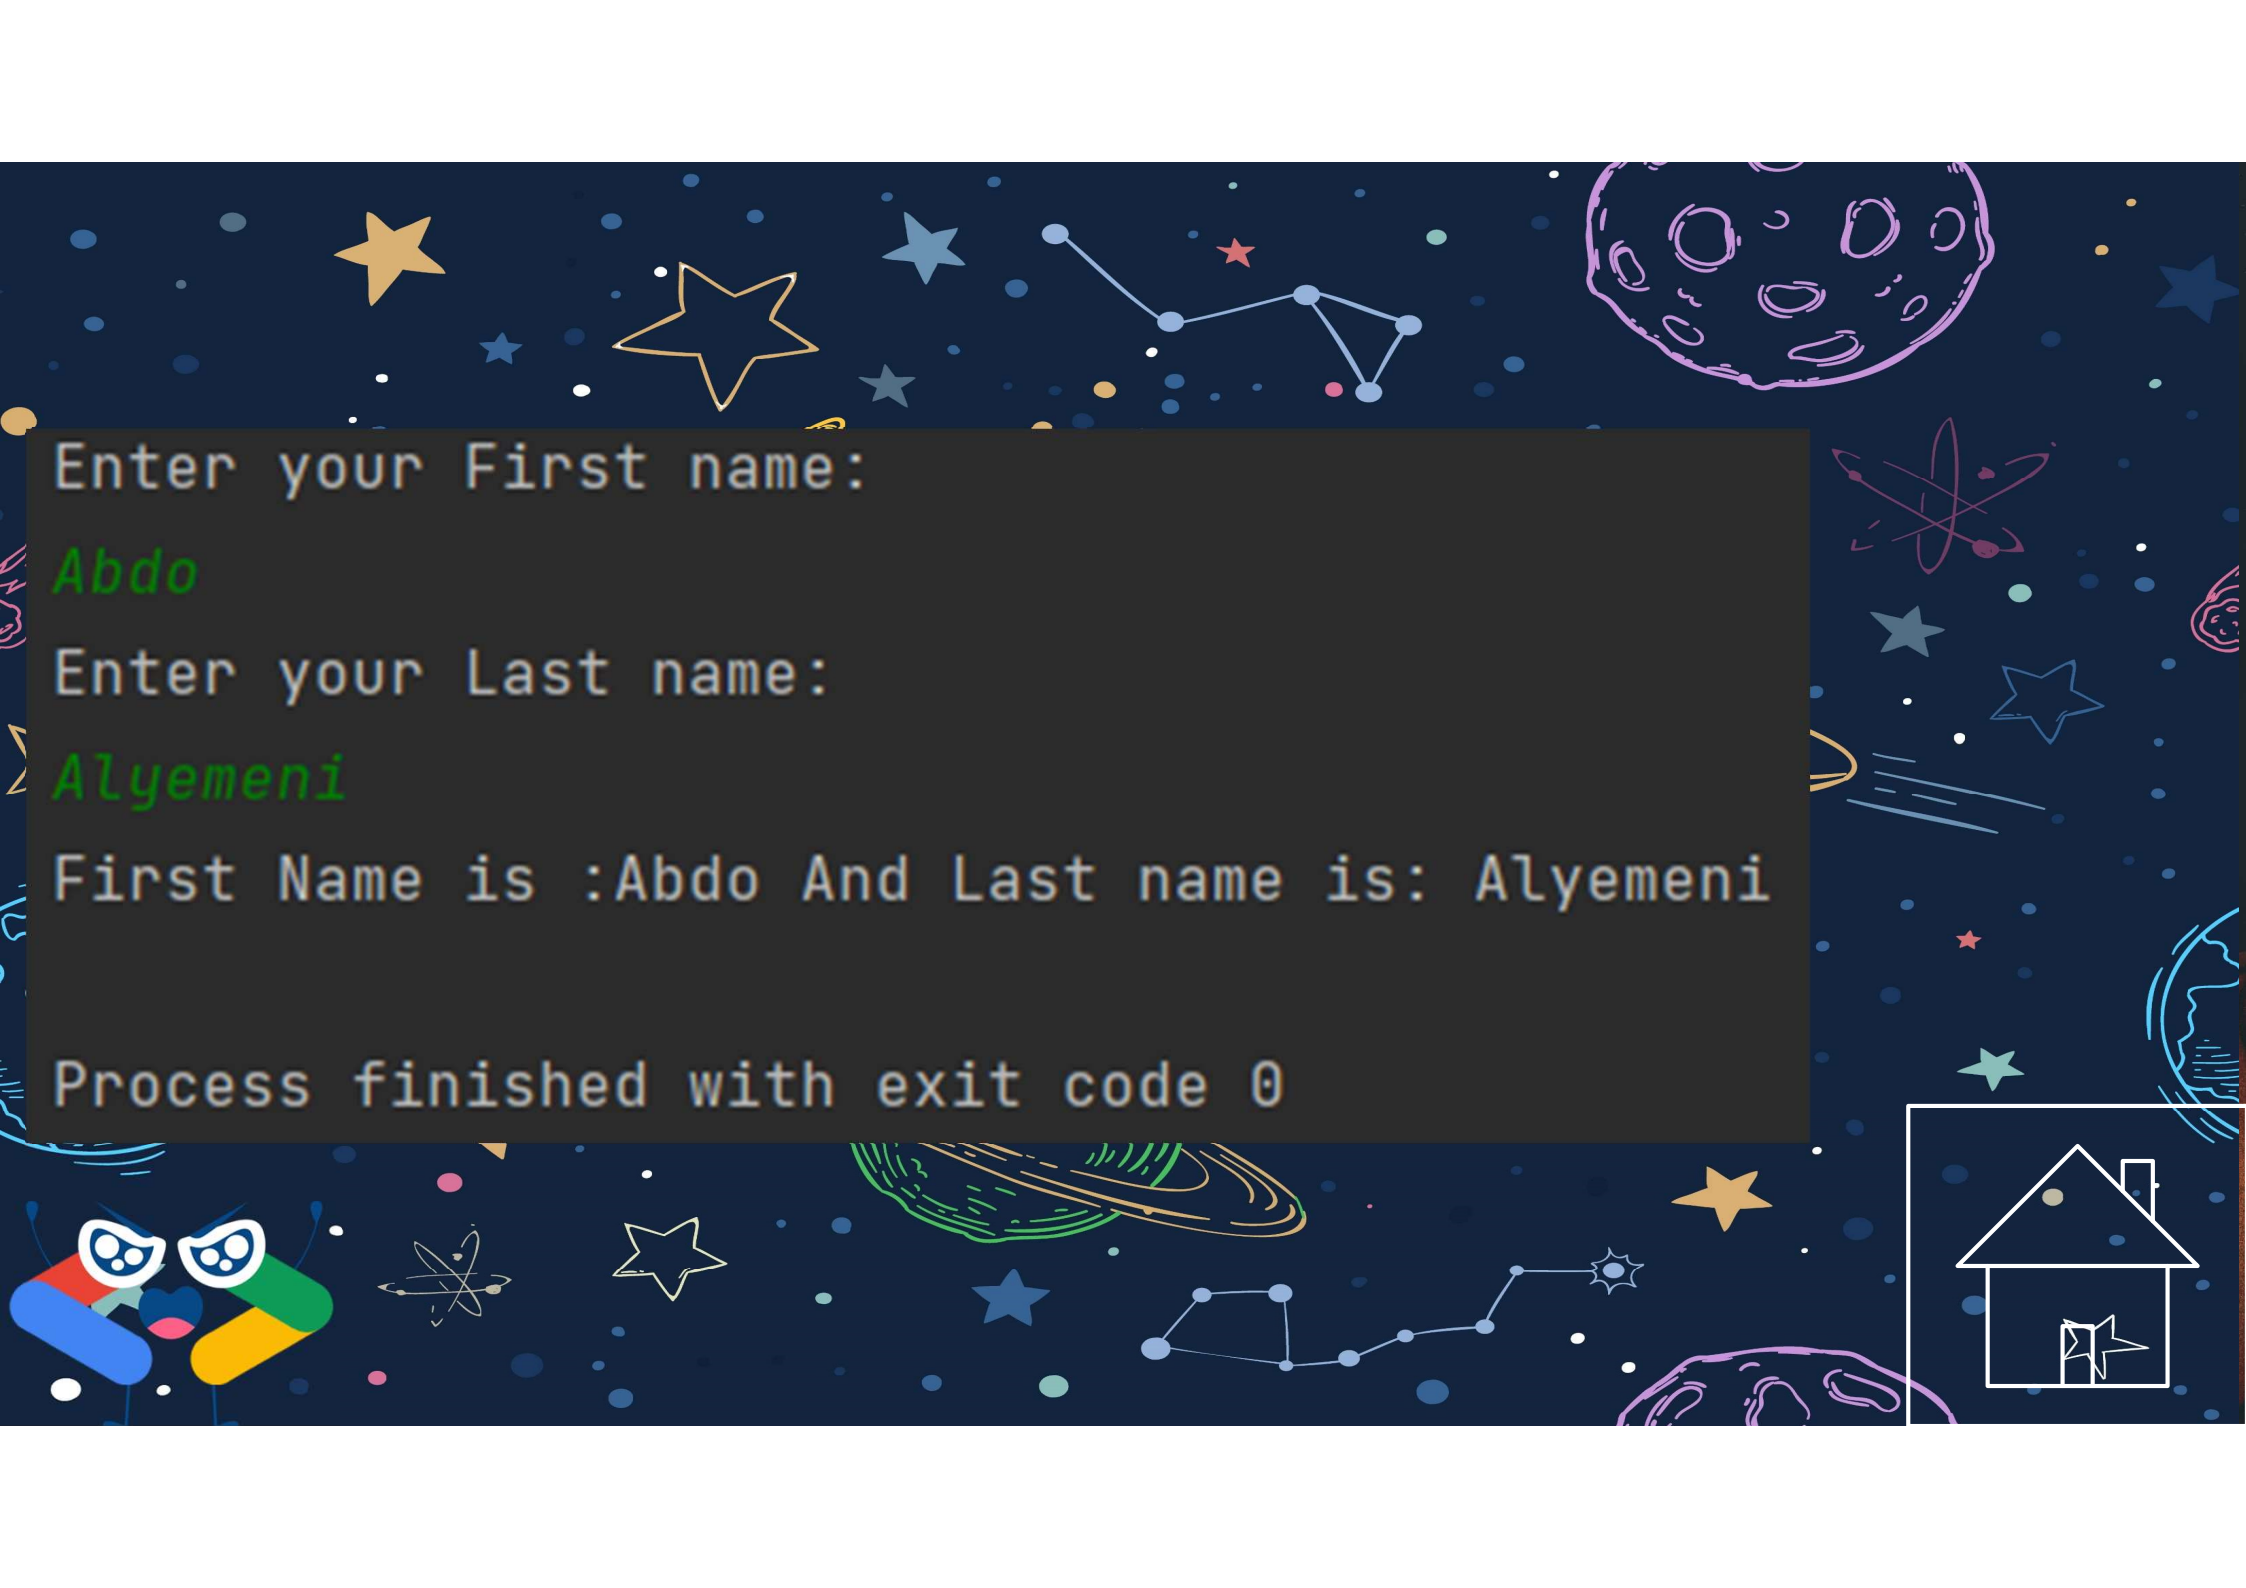

Numbers are equal

Write lines of code that cast
String to List
(use functions)

Enter your First name:

Abdo

Enter your Last name:

Alyemeni

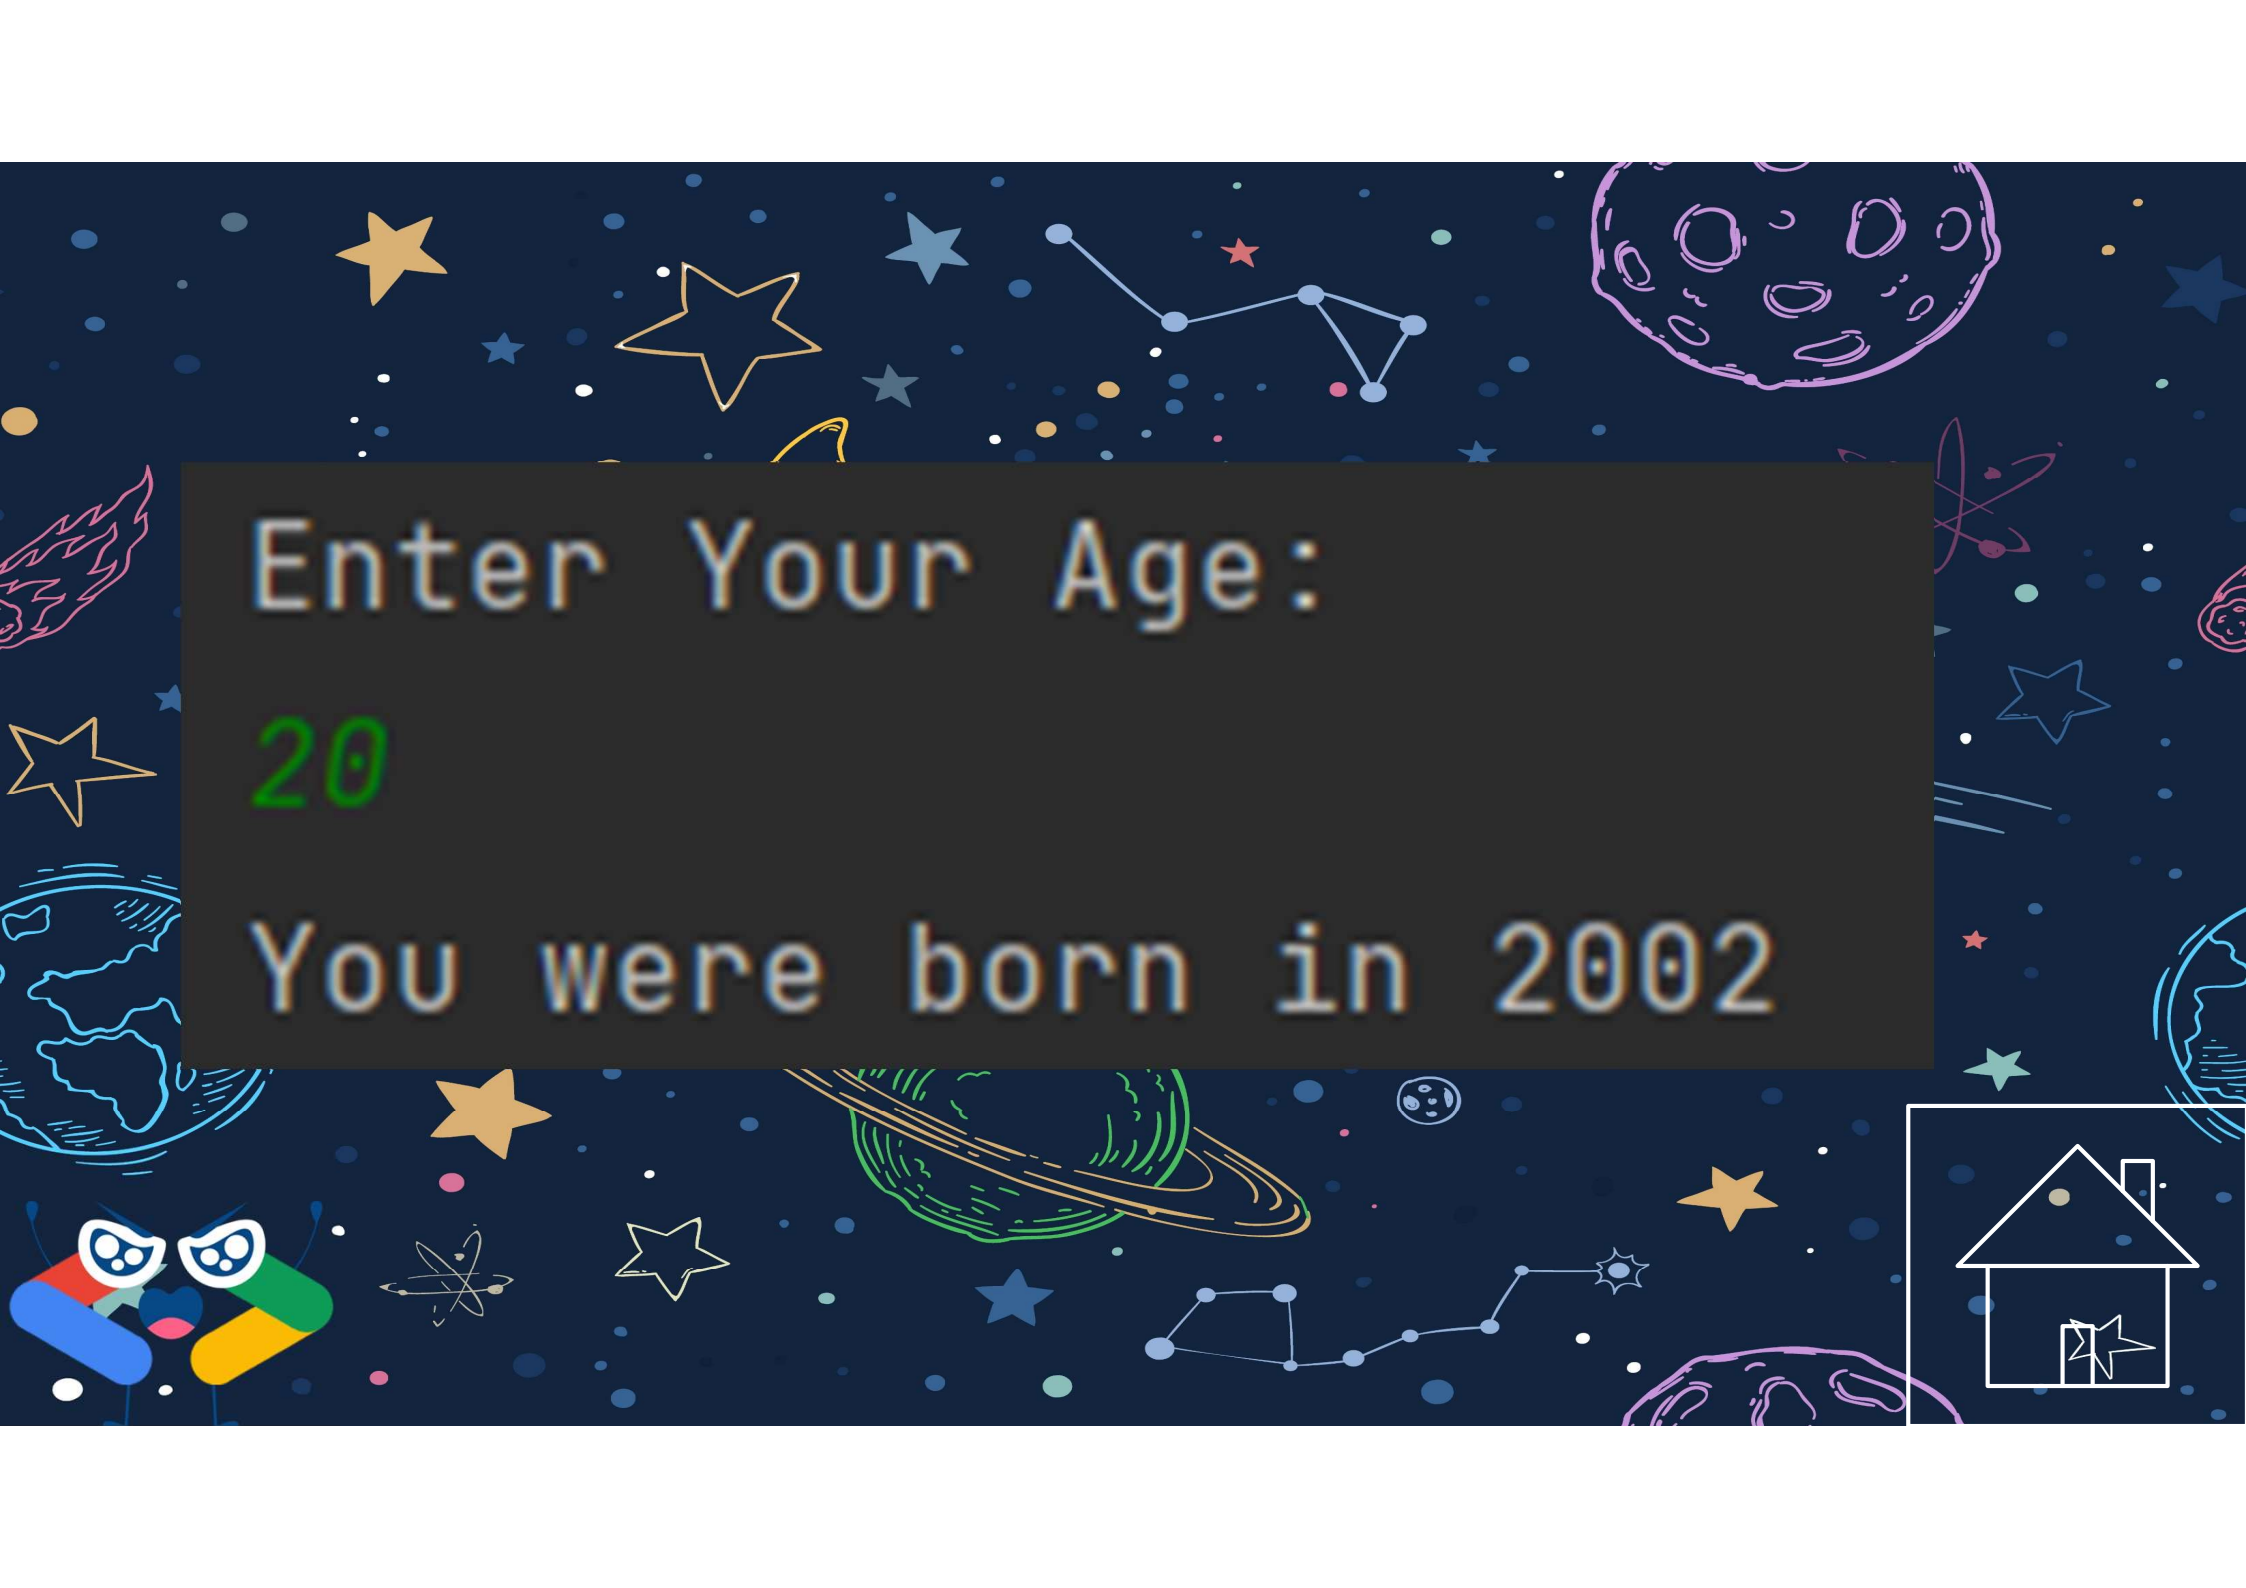

First Name is :Abdo And Last name is: Alyemeni

Process finished with exit code 0

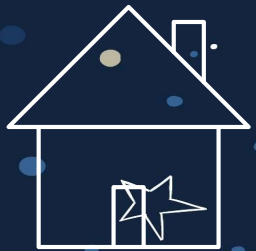

What is the command that create
A dart project in CMD
(command prompt)

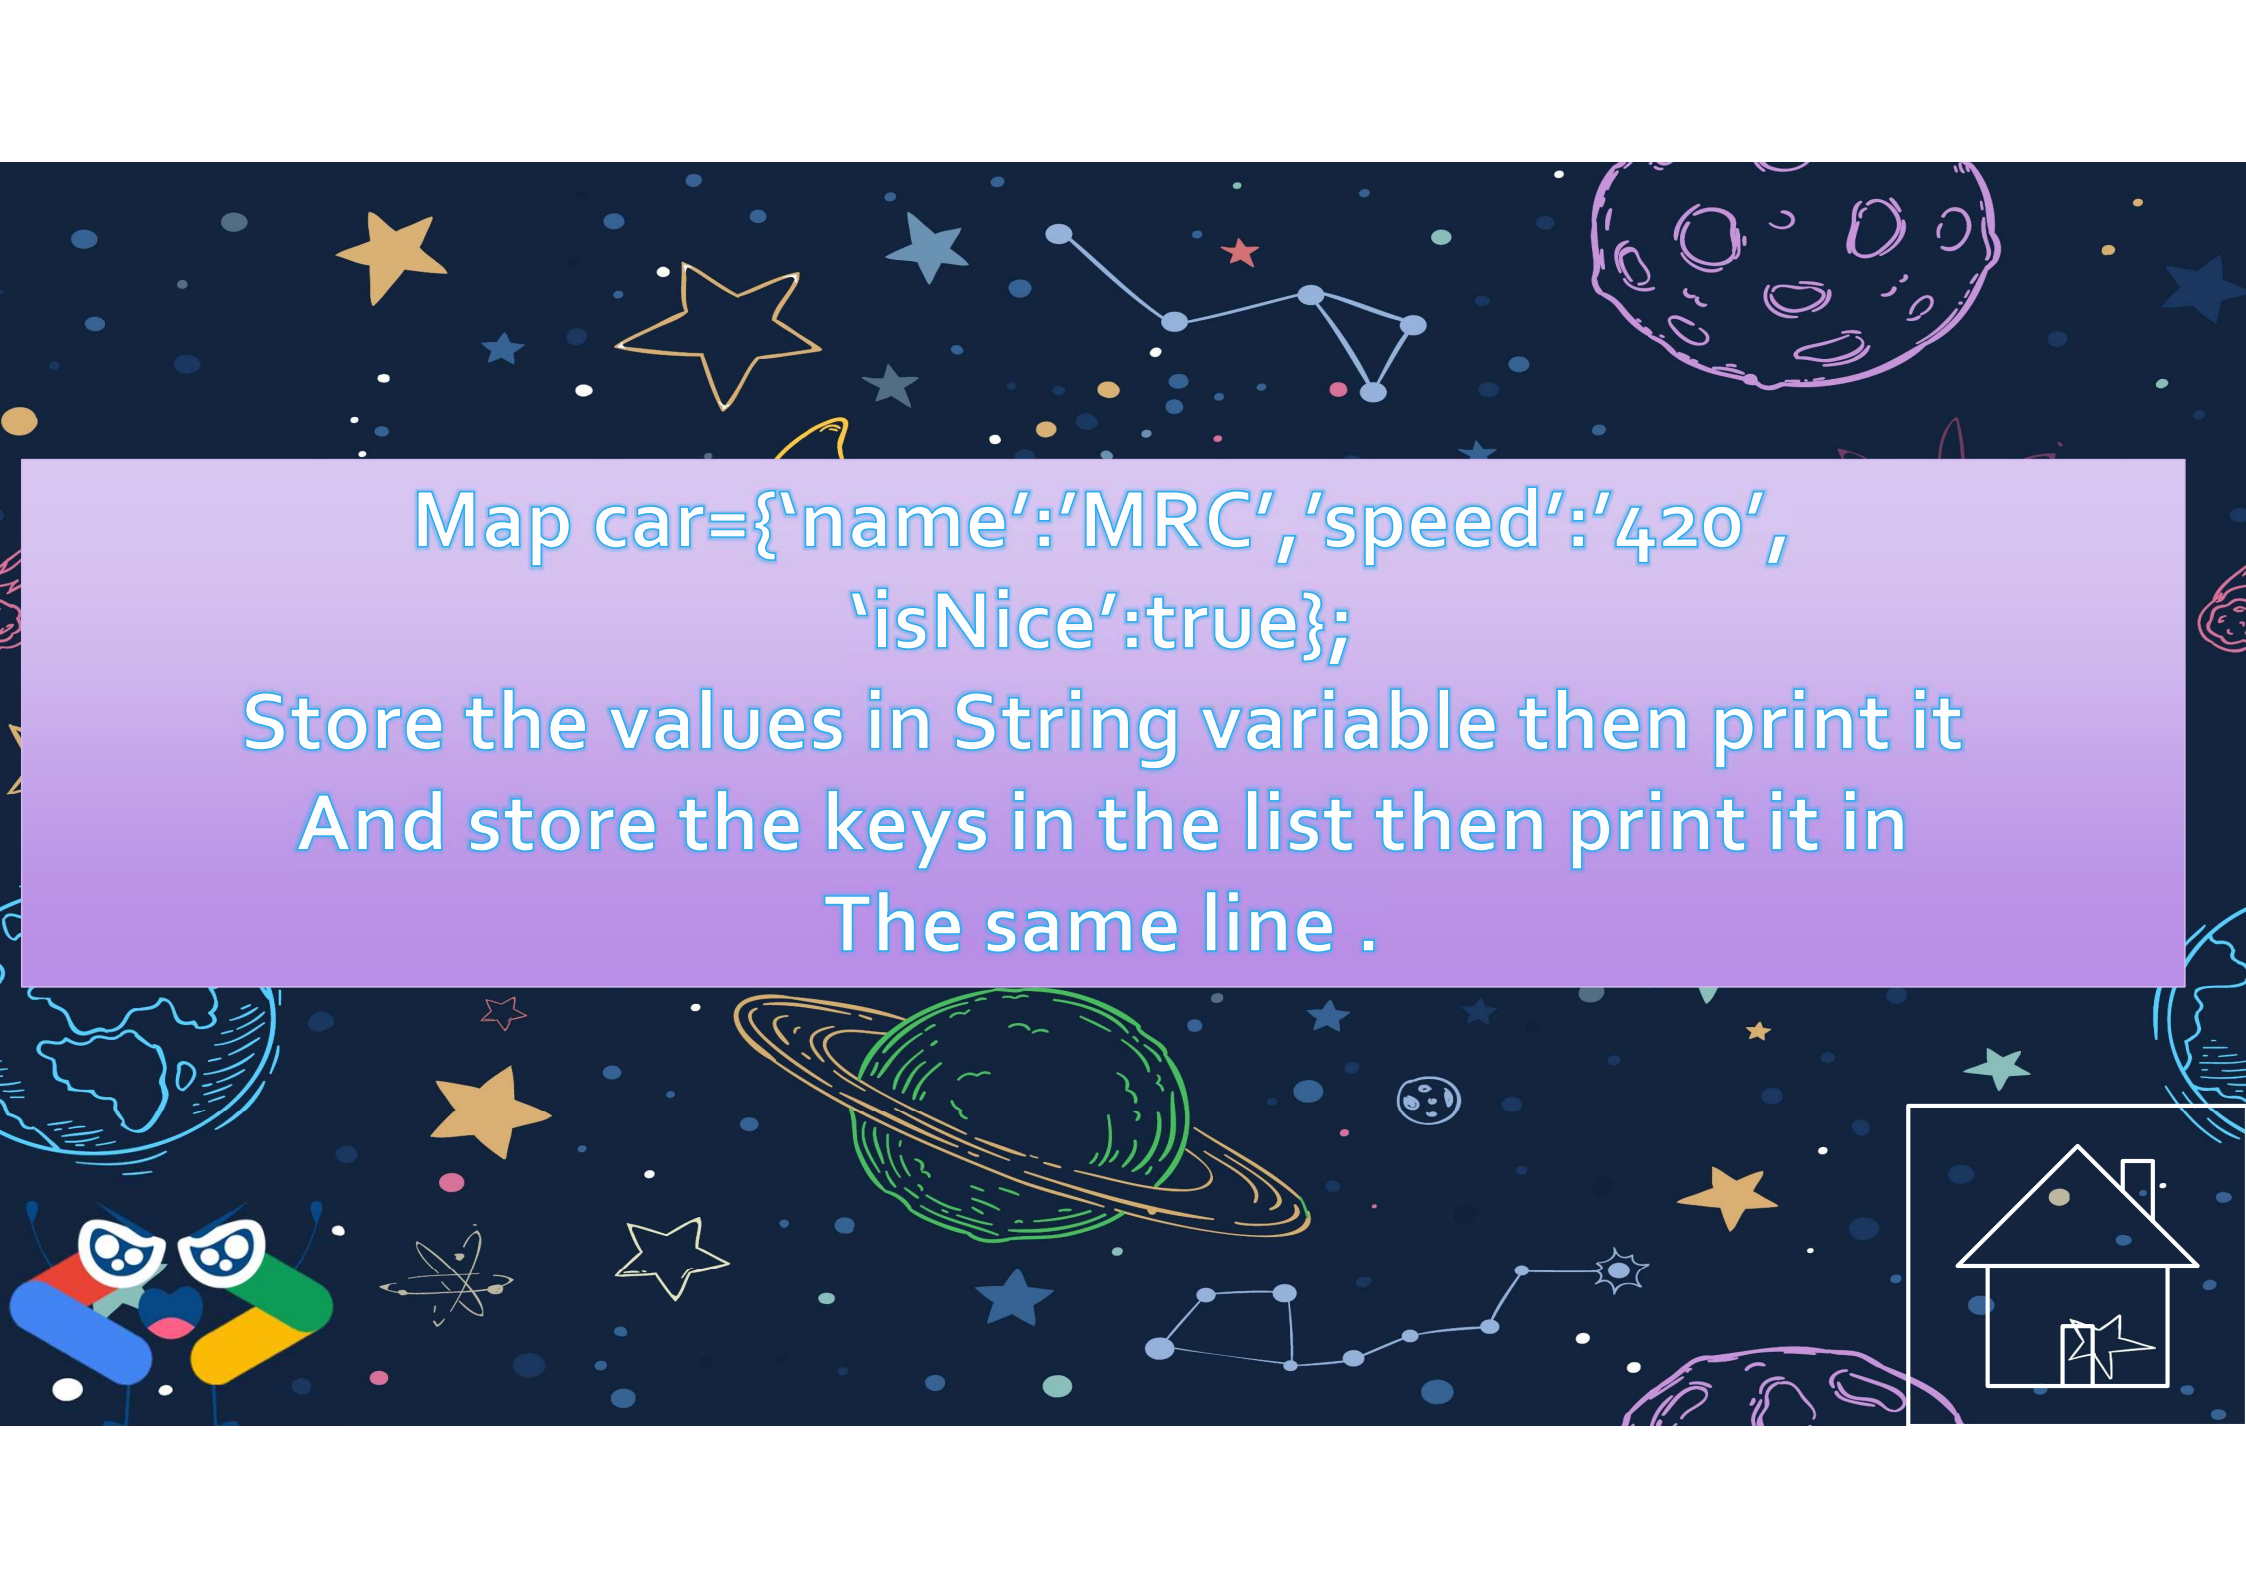

Enter Your Age:

20

You were born in 2002

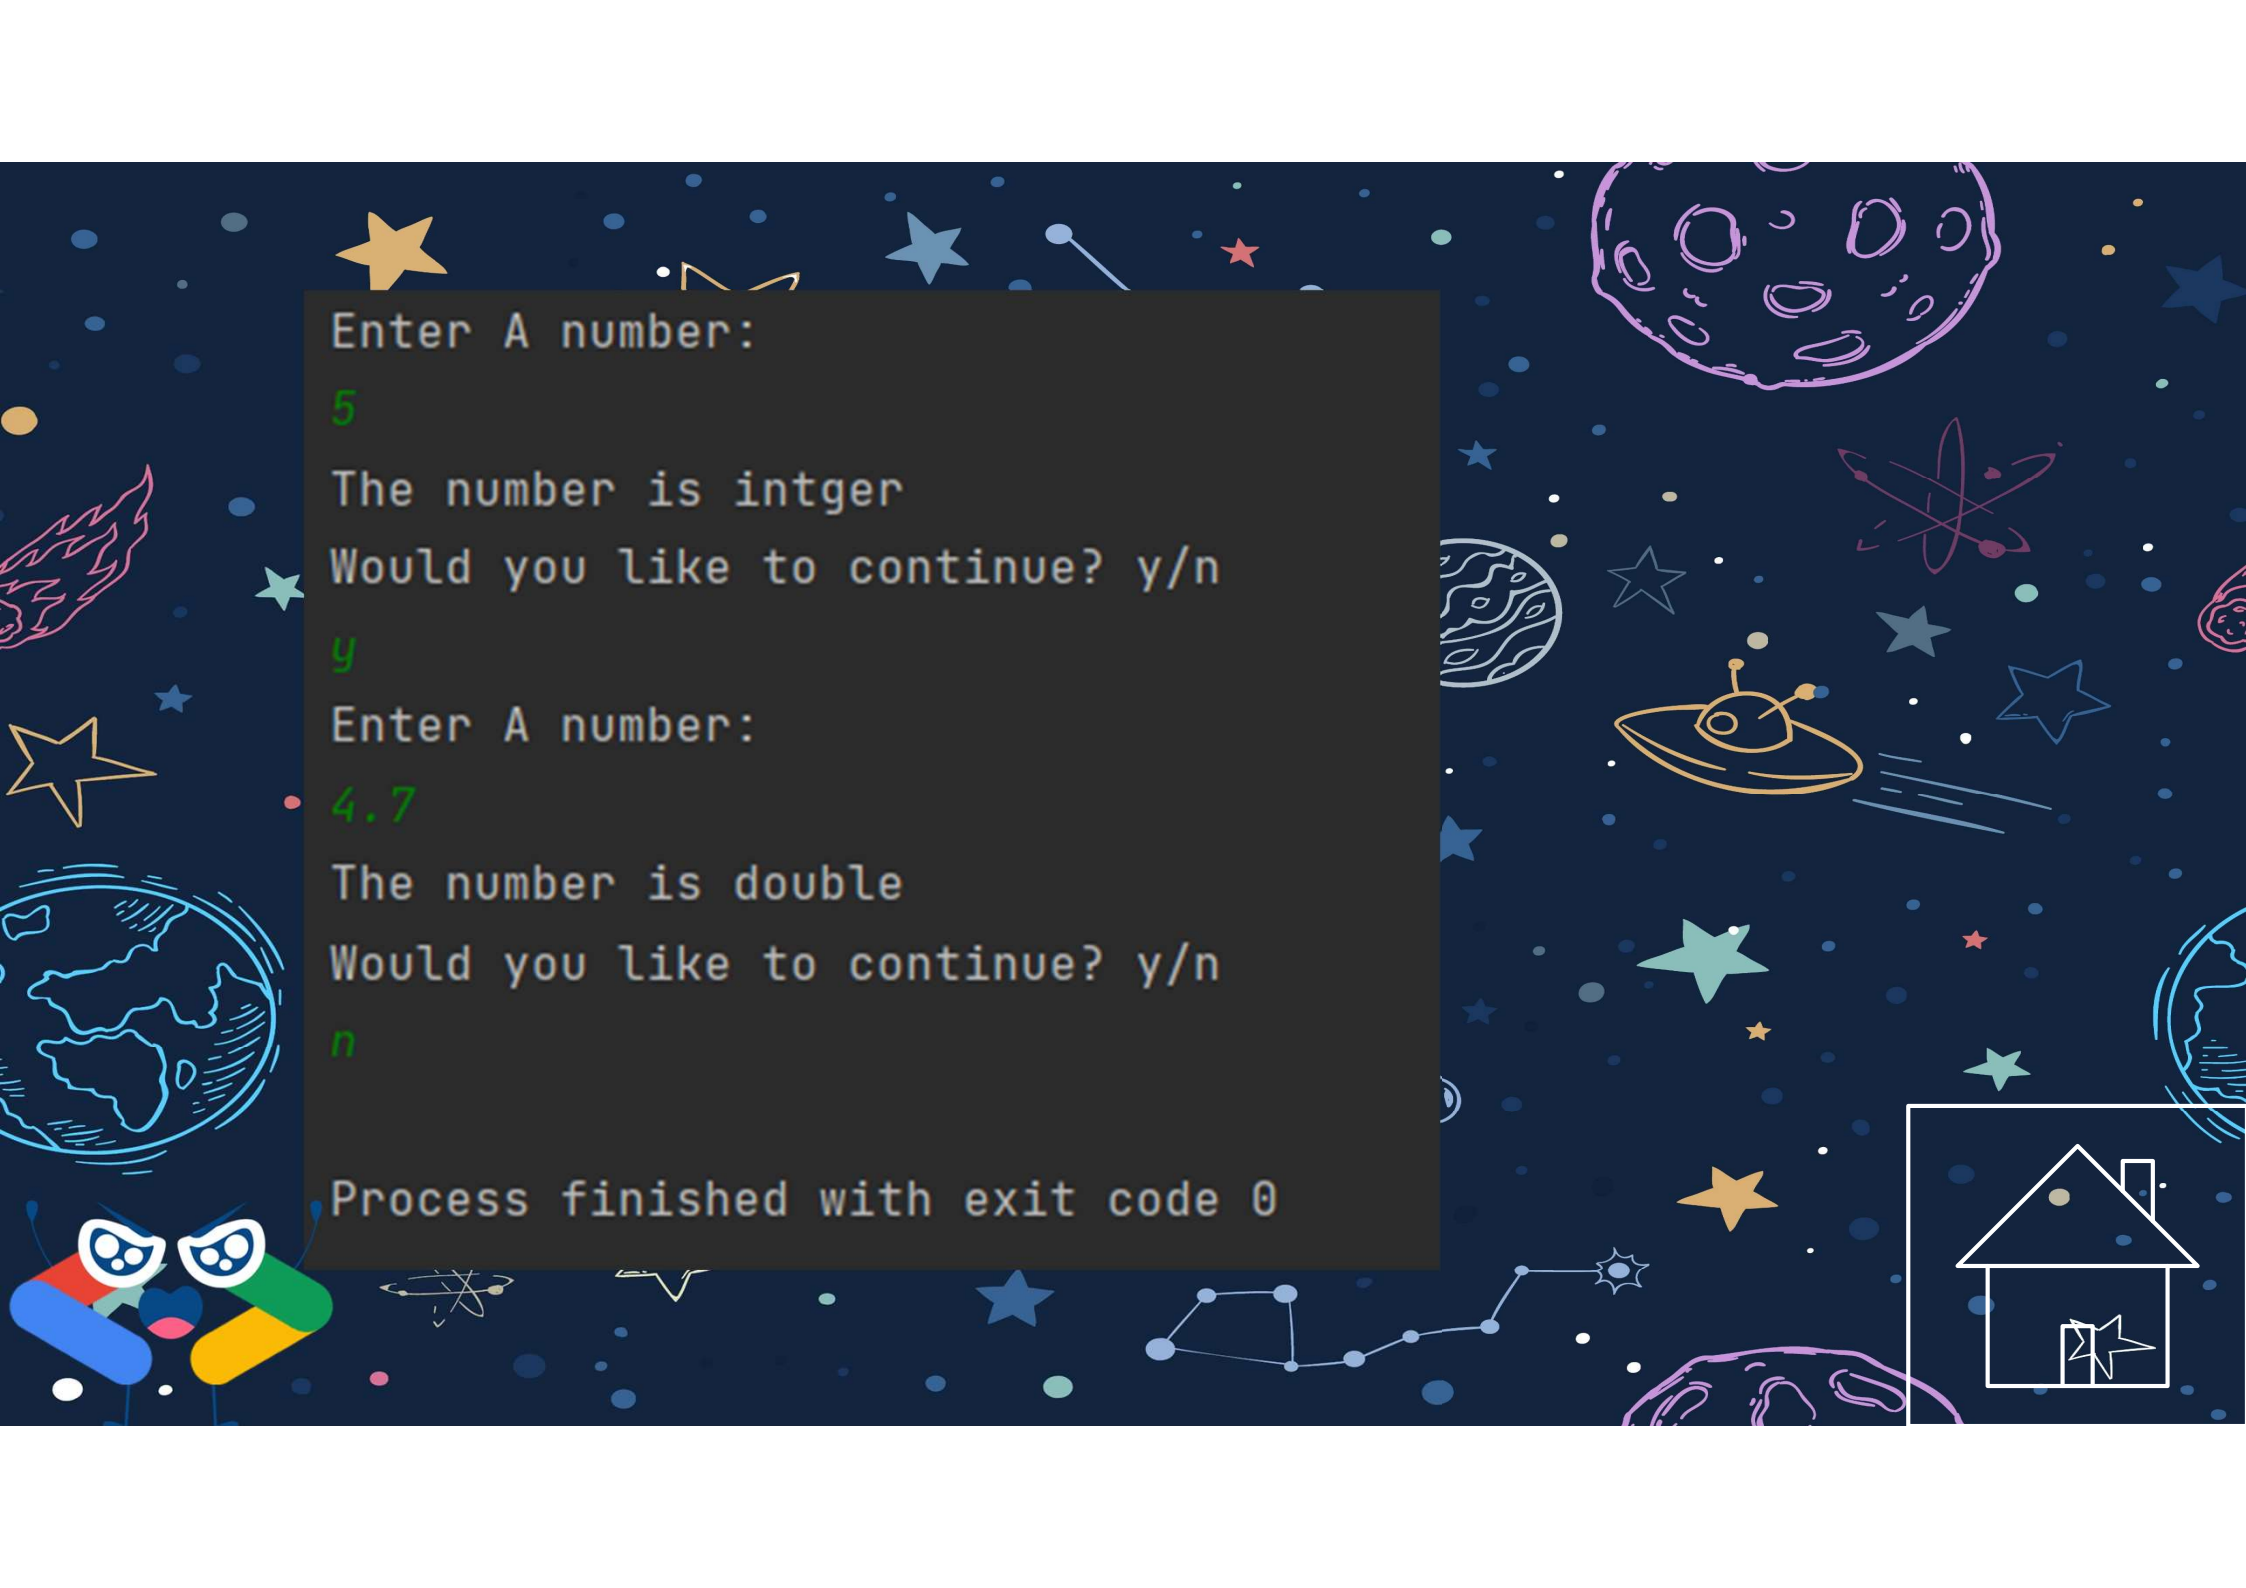

```
Map car={'name':'MRC','speed':'420',  
        'isNice':true};
```

Store the values in String variable then print it
And store the keys in the list then print it in
The same line .

```
Enter A number:
```

```
5
```

```
The number is intger
```

```
Would you like to continue? y/n
```

```
y
```

```
Enter A number:
```

```
4.7
```

```
The number is double
```

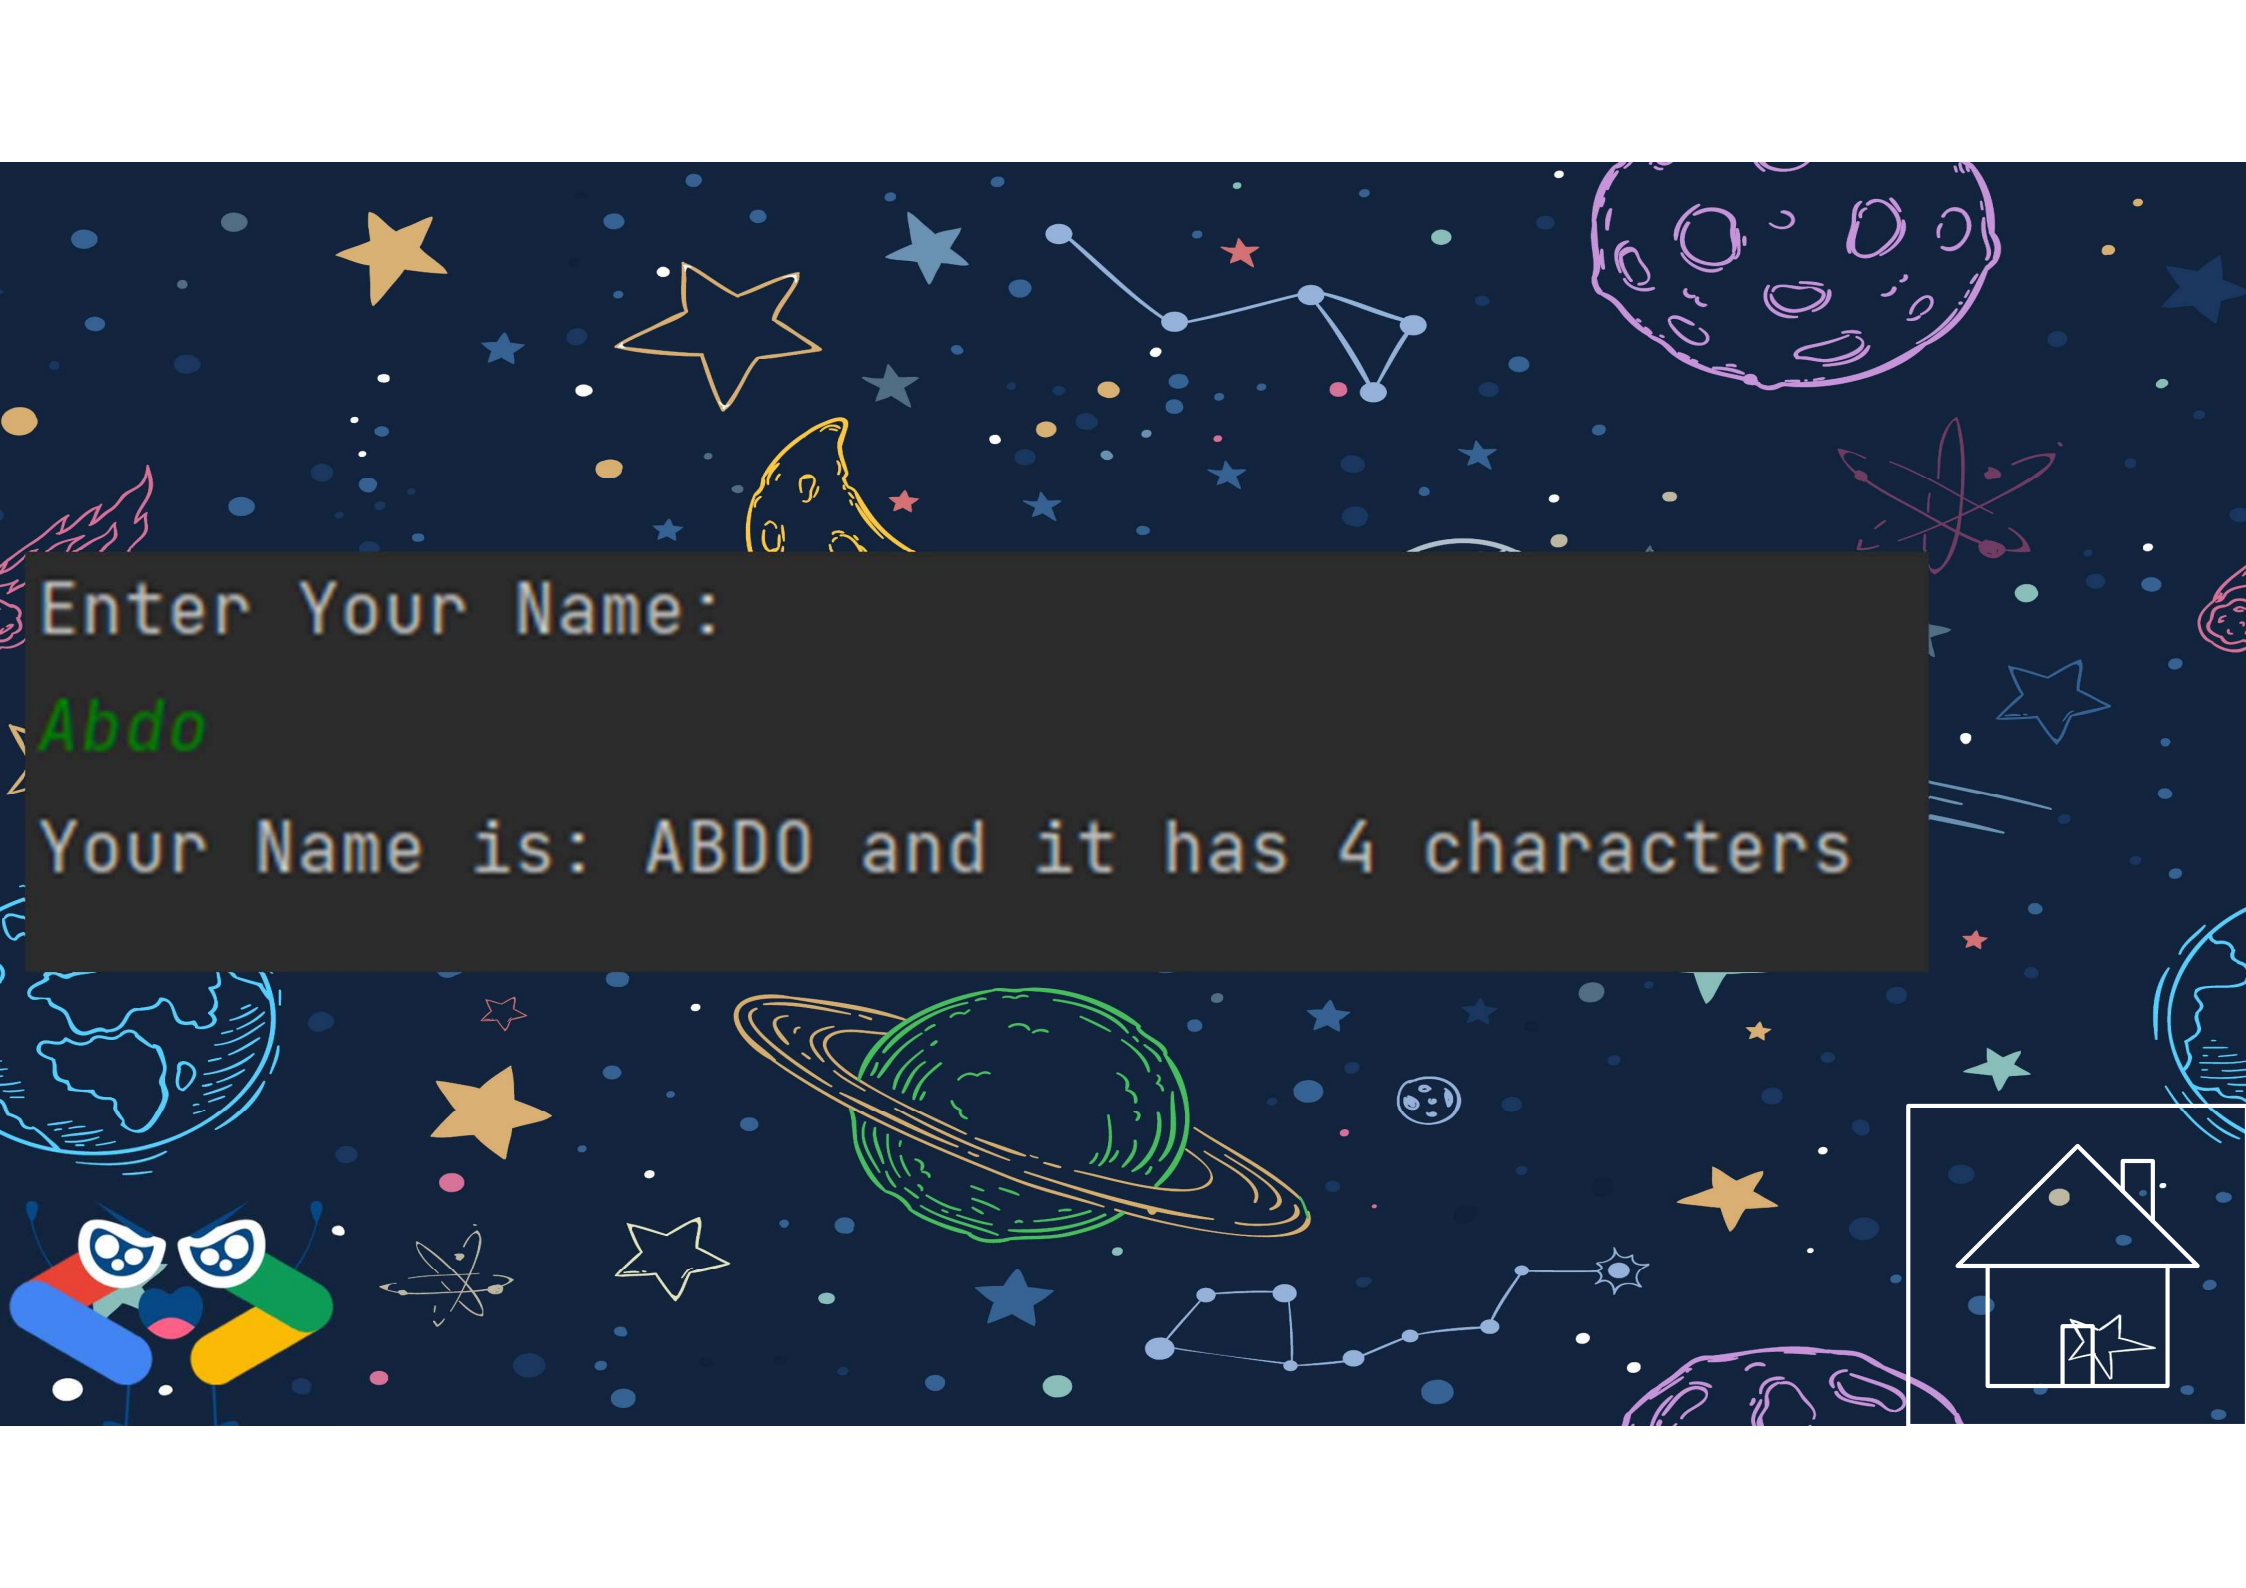

```
Would you like to continue? y/n
```

```
n
```

```
Process finished with exit code 0
```

Convert any list variable to map with
index key

Enter Your Name:

Abdo

Your Name is: ABD0 and it has 4 characters

Map car={'name':'MRC','speed':'420',
'isNice':true,'modle':2009};
Using foreach print all keys without the first
And last key
